## Course description

---

Is climate change something which really interests you? Are you environmentally aware but want to know more?

This course will help you to understand the nature of climate change and the role you can play in helping to reduce carbon emissions. From this you will be able to drive positive change within your workplace, as well as at home.

You will:

- become familiar with the basics of the environment and climate change
- develop an understanding of environmental protection
- understand about actions that can be taken to mitigate the damaging impact of industry on the environment
- explore how individuals' lifestyles can be environmentally detrimental
- discover ways for individuals and industry to reduce their carbon footprint

To access this course your English skills should be at around Level 1

On successful completion of this course, you will achieve Level 2 Certificate in Understanding Climate Change and Environmental Awareness.
