

Digital and IT

What is Artificial Intelligence?

We've all heard of Artificial Intelligence, it's in the news, in films, and has even made its way into education.

What are the entry requirements?

No formal requirements, but students will need existing basic digital skills or to have completed the First Steps with Computers course.

Course description

We've all heard of Artificial Intelligence, it's in the news, in films, and has even made its way into education. But what actually is AI? What can it do and is it something we should be concerned about? On this course, you'll learn about ChatGPT, using it for yourself to find out more about its strengths and limitations.

It is recommended people create a ChatGPT account before the course starts.
