

# Digital and IT

## What is Artificial Intelligence?

---

We've all heard of Artificial Intelligence, it's in the news, in films, and has even made its way into education.

### When does this start and end?

- 4 July 2024 - 5 July 2024

### What are the entry requirements?

You will be required to have basic digital skills to complete this course. For students where there is no evidence of this, you may be asked to complete a short assessment, this will help us make sure you are on the right course.

We recommend that those without basic digital skills complete the Learning to Learn Digitally course first.

### Need more information?

You can find out more about Northern College and the courses on offer by calling us on 01226 776000 or emailing us [courses@northern.ac.uk](mailto:courses@northern.ac.uk)

## Course description

---

We've all heard of Artificial Intelligence, it's in the news, in films, and has even made its way into education. But what actually is AI? What can it do and is it something we should be concerned about? On this course, you'll learn about ChatGPT, using it for yourself to find out more about its strengths and limitations.

It is recommended people create a ChatGPT account before the course starts.

## Want to learn more?

---
