Course description

This innovative new enterprise programme is aimed at learners seeking the skills and knowledge needed to develop a business start-up; the pathway includes three strands:

- **Business Start-Up** gives learners an understanding of the initial processes and requirements of a business start-up, knowledge of the first steps in creating a business start-up, including the marketing, legal and financial requirements, and an understanding of how to write a business plan
- **Lean Organisation Techniques** involves learning specific techniques and tools to improve business performance including enabling effective team performance and in addition, how to access the business sector/further qualifications and learning
- **Business Improvement Techniques** including process analysis, problem solving, workplace organisation and continuous improvement techniques
- Industry guest speakers may form part of this curriculum subject to availability

The course is delivered via a hybrid study programme consisting of two days per month in college over six months and the remainder of the course is self-study distance learning. Study is supported by the provision of a tailored virtual learning environment which is accessed from home.
